PROFILE

Final-year Computer Science student at Pan-Atlantic University with production experience shipping fullstack web applications (Next.js, React, NestJS, PostgreSQL) and building AI-powered products. Completed infrastructure internships at MTN Nigeria and Cyberspace Limited. Founded and run a profitable streetwear brand from scratch. Looking to bring a builder mindset and strong fullstack skills to a product-focused engineering team — particularly in fintech, health-tech, or developer tools.

EDUCATION

Pan-Atlantic University, Ibeju-Lekki, Lagos

Bachelor of Science in Computer Science — **Expected December 2026**

Relevant Coursework: Software Engineering, Machine Learning, Data Science, Systems Programming, Computer Networks, Network Security, HCI

PROJECTS

Style Genie — AI Wardrobe & Outfit Recommender — *React Native, Node.js/Express, Python, MongoDB Atlas, AWS S3*

- Building an AI-powered wardrobe app (capstone project) that recommends outfits based on the user's actual clothing, body measurements, and color theory
- Uses ResNet-50 for clothing classification, U2-Net for background removal, and OpenCV for color extraction to analyze uploaded garments
- Designed for Nigerian infrastructure constraints with offline-first architecture and optimized asset delivery via AWS S3
- End-to-end ownership: system design, ML pipeline, mobile frontend, REST API, and cloud deployment

LeadFlow AI — Automated Lead Qualification System — *React, Vite, Tailwind CSS, Python, FastAPI, Claude API, SQLite*

- Built an AI-powered lead qualification tool that automates scoring and prioritizing inbound sales leads for a simulated marketing agency pipeline
- Ingests messy CSV exports and uses Claude's API to extract structured buying signals (intent, urgency, budget status, decision-making authority) from unstructured conversation notes
- Scores leads with a custom three-layer model (firmographic fit, behavioral signals, engagement quality) and classifies them as Contact Now, Nurture, or Disqualify
- Dashboard features a visual pipeline funnel, score distribution chart, per-lead AI reasoning, searchable lead table, run history, and Excel export
- Live at leadflow-ai-peach.vercel.app — backend deployed on Render with FastAPI + SQLite

XL Billboards Website — xlbillboardsng.com — *Next.js, TypeScript, Prisma, PostgreSQL, Leaflet, Cloudinary*

- Built and deployed a production corporate website for an outdoor advertising company as a freelance client project
- Features searchable billboard inventory (25+ locations), interactive maps with GPS coordinates, admin panel with full CRUD, blog CMS, quote request flows, and WhatsApp integration
- Chose Leaflet/OpenStreetMap over Google Maps API to eliminate billing costs; deployed on Vercel with Neon (serverless PostgreSQL)
- Live at xlbillboardsng.com — actively used by the client for lead generation

CityCare EHR — Healthcare Management System — *React, TypeScript, NestJS, PostgreSQL*

- Built the frontend for a modular Electronic Health Records system as part of a 6-person team (university group project)
- Implemented dashboard, patient management, appointment scheduling, lab results, and profile screens with responsive design

- System architecture spans 7 modules: IAM, Scheduling, Clinical, Lab, Billing, Admin, and Notifications

Clinic Management System — *React, NestJS, PostgreSQL*

- Built a full-stack clinic platform with CRUD operations for patient records, appointment management, and role-based access

EXPERIENCE

Transmission Intern | MTN Nigeria, Lagos / 2025

- Worked within the Transmission Team at MTN HQ (Ikoyi) supporting fiber optic and microwave transmission infrastructure across the Lagos region
- Participated in a site relocation project and fiber rerouting exercises, contributing to field inspection documentation
- Analyzed fiber performance reports using OTDR tools, flagging attenuation and latency anomalies for the senior engineering team
- Monitored live network health using Huawei iManager and Ericsson ENM, escalating faults that could affect service uptime

IT Intern | Cyberspace Limited, Lagos / Jul – Sep 2024

- Monitored and maintained enterprise network infrastructure alongside senior engineers across multiple client environments
- Diagnosed and resolved LTE connectivity and routing configuration issues, reducing average ticket resolution time
- Managed support tickets with consistent prioritization, contributing to improved SLA adherence during high-volume periods
- Gained hands-on experience with ISP operations: wireless access, switching, VLAN configuration, and data flow monitoring

Founder | Retro Locker (Streetwear Brand) / 2022 – Present

- Founded and operate a streetwear brand targeting Gen Z consumers, built from zero with no external funding
- Handle end-to-end operations: product sourcing, brand identity, Instagram marketing, and direct customer engagement
- Grew the brand's Instagram following organically through content strategy and consistent visual identity

Marketing & Sales Assistant | Maxmode Gadgets, Lagos / 2022

- Managed social media marketing campaigns that increased product visibility by ~30% over the engagement period
- Delivered tailored tech product recommendations in-person and online, supporting both B2C and walk-in sales

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, Java, SQL, HTML, CSS

Frontend: React, React Native, Next.js, Tailwind CSS, Vite, Responsive Design

Backend: Node.js, Express.js, NestJS, FastAPI (Python), REST APIs, Prisma ORM

Databases: PostgreSQL, MongoDB, MySQL

AI / ML: ResNet-50, U2-Net, OpenCV, Scikit-learn, Google Colab, Jupyter Notebooks

DevOps & Tools: Git & GitHub, Vercel, AWS S3, VS Code, Cloudinary, Postman

Networking: LTE Monitoring, Fiber Optic & Microwave Transmission, Huawei iManager, Ericsson ENM, WhatsUp Gold, MobaXterm

Other: Digital Marketing, SEO, Figma, CorelDRAW

INTERESTS

Software Development, Fintech, AI/Automation, ISP Networking, Fashion & Personal Branding, Boxing, Basketball, Long Tennis.
